Small enterprises specializing in health care, research & development, education, consultancy, service activities, and much more for you...

To attn: all health-care providers around the globe (physicians, dentists, pharmacists, nurses, social workers, scientists, *etc.*)

Announcement and Invitation to Participate: International Exhibition of Fine-artist Physicians (May 12, 2018: Zagreb, Croatia)

Doctors in general are only known to perform the science and art of maintaining and restoring human health, but some of them also provide culture-making services to society: in addition to treating patients, many physicians paint, do sculptures, play the piano, sing, *etc*, and some of their works are indeed breath-taking, albeit not yet recognized.

I am the founding director of *Asklepios-Med*, which is a global private medical practice and research center based in Hungary (*www.asklepios-med.eu*). Apart from our daily clinical routine, patient care and internationally renowned scientific research, and having recognized the above artistic facts in medicine, *Asklepios-Med* regularly organizes exhibition-series of fine-artist physicians and concerts of doctor-musicians from all over the globe to show the other face of the health care providers to the entire world. There has never been such a cultural event of this kind to reveal the *"hidden treasures of medicine"*, and the first few stations of our exhibition/concert-series were well received by both medical professionals and the public: please consult the gallery (*www.asklepios-med.eu?culturalevents*) on our home page for further details. In order to proceed with these traditions and in continuation of our successful intellectual events, the next chapter of the exhibition-series of *Asklepios-Med* will open on May 12, 2018 in Zagreb, Croatia. I cordially invite you to join our unique event in this important cultural, scientific, financial and historical capital city, where:

- 1. Art-works to be displayed may include paintings, sculptures, photos, embroidery, and anything considered fine-art. There will be neither selection, nor competition, nor censorship of any kind. The only criterion to participate is that you have to be a medical professional or work in relation to health-care, and the master-piece is created by yourself.
- 2. This is a non-profit cultural initiative, therefore no registration or admission fees will apply: the exhibition is absolutely free for you to join and attend. Your guests are also more than welcome.
- 3. Participants are expected from all over the world, including most European countries and several nations from all other continents, therefore this one-of-its-kind cultural event will be a great opportunity to meet doctors globally, and to interact with colleagues both professionally and artistically, which enables establishing scientific and cultural friendships and possible future collaborations.
- 4. Should you wish to exhibit, please contact the organizers by e-mail for further information and a very brief application package at palotas@asklepios-med.eu (application deadline is February 28, 2018).

I would also humbly like for you to please kindly distribute this opportunity among all your colleagues and health-care professionals in your country.

I look forward to meeting you during this exciting international exhibition the coming spring! In the meantime, I would like to take this opportunity to wish you and your loved ones a joyful holiday season and a happy, successful new year.

Sincerely:

prof. dr. András Palotás founding director *Asklepios-Med* (www.asklepios-med.eu)
